

OUT FROM THE BLUE

MAGNAPPOOL

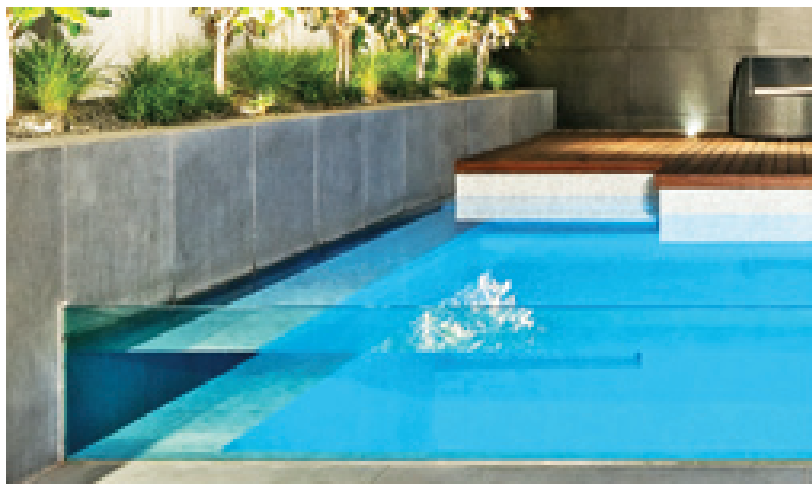

## MIRACLE WATER

A HEALTH RETREAT IN YOUR HOME

For thousands of years people have used magnesium for relaxing, rejuvenating the skin, detoxing the body and promoting a holistic, healthy being. MagnaPool has taken this miracle mineral and developed Mineral Science Therapy – a unique blend of magnesium and potassium minerals to give you mineral water for your swimming pool.

Forget swimming in pool water full of chlorine and other harsh chemicals, which leave your skin and hair dry and salty. The MagnaPool system delivers a healthier and more environmentally friendly alternative to traditional chlorinated pools. It is mineral based, and the magnesium mineral in the water works as a natural clarifier and anti-bacterial so the demand for sanitisers is far less.

You are left with water which is gentle and therapeutic on sensitive skin, and can support detoxification, reduce stress and anxiety, help to alleviate aches and assist with a healthy sleep cycle.

Two forms of magnesium are found in MagnaPool water. Magnesium chloride found in MagnaPool minerals is derived from the Dead Sea, and is extremely beneficial in assisting your internal health, as well as balancing your mind and body. The MagnaPool generator produces magnesium hydroxide – this form of magnesium is gentle on sensitive skin and other problem skin conditions. Magnesium works like a magnet on your skin, helping to detoxify impurities and toxins and to reduce pore size, ultimately leaving your skin feeling soft, radiant and smooth.

Owning a MagnaPool will also reduce your carbon footprint on the environment, as this efficient system will result in a reduction of electrical power required. The filtration system also saves water through the use of a unique glass filtration medium. Less backwashing is needed meaning lower backwashing water requirements.

Providing you with superior water, MagnaPool is the first swimming pool system of its kind in the world, winning numerous prestigious awards, both nationally and internationally. MagnaPool is owned by Poolrite, and is sold throughout Australia, New Zealand, Thailand and selected countries in Europe. Out From The Blue in Melbourne are one of MagnaPool's accredited dealers.
